

HEXA FINANCE AUTOMATION PLAN

Full Finance Operations Automation

PREPARED BY : Asim
DATE : 3 June 2026

CONTENTS

1. Purpose & Background
2. The Problem — What We Are Fixing
3. Platform Overview — Hexa Finance
4. 13 Automation Modules
5. Phase 1 & 2: CSI Core, AP & Controls (3–17 Jun)
6. Phase 3 & 4: ARIA, Fund Flow, Consolidation (18 Jun–7 Jul)
7. Benefits & Expected Outcomes
8. What This Means for the Team
9. Key Dependencies & Risks

PURPOSE & BACKGROUND

WHY WE ARE BUILDING THIS

- Hexa Finance Operations processes payroll and consultant payments across 7 countries for multiple legal entities. Today, every cycle involves manual work across WhatsApp, Excel, Zoho, and the bank portal — creating risk, errors, and delays.

THE GOAL

- Automate the full finance operations cycle end-to-end by 7 July 2026. From CSI upload to statutory filing, from invoice generation to bank payment, from intercompany reconciliation to month-end close — all in one connected platform.

WHAT IS ALREADY BUILT

- CSI Flow (Hexa Finance Operations) is complete and live as of 3 June 2026.
 - Spreadsheet upload → validation → maker-checker approval → Zoho accrual journal → Maybank bank file → payment posting → audit trail
- HexaComply compliance calendar is built and operational

WHAT GETS BUILT IN THE NEXT 30 DAYS

- 12 additional automation modules across AP, AR, payroll, statutory, intercompany, treasury, and consolidation.

THE PROBLEM — WHAT WE ARE FIXING

Pain Point	Observation / Impact
Last-minute fund planning	Cash built 2-3 days before payout. No rolling forecast. Every fortnight is a crisis. HSSB EOR deficit of RM 103k surfaced 2 days before 7 May payout.
WhatsApp approvals — no audit trail	6 messages deleted from the payment approval channel in 2 weeks. No tamper-proof record of who approved what and when.
PIR before PR signed	Payment initiated before purchase request approved. Control sequence inverted. Bank rejection on Hilton Kuching due to incorrect BRN.
Month-end close: 6.5 weeks late	April 2026 books closed on 15-16 May — 6.5 weeks after month-end. Target for IPO-track company: 15 working days.
Statutory filing at last minute	PPh21 April received 13 May, due 18 May — 5 days lead time. BPJS dependent on same-day collections.
EOR funds used as float	EOR ring-fenced funds used to cover operational deficits 3 cycles in a row: RM 15k, RM 103k, RM 77k.
Long hours spent for accounting	CSI entries on accruals and payment is taking long time for FEs to book in the system. This will reduce the time by 4-5 hours.

13 AUTOMATION MODULES

No.	Module / Description
1	CSI Flow — API integration with CSI Generator (inbound CSI + outbound payment confirmation)
2	Statutory module — EPF, SOCSO, EIS, HRDF, MTD (MY); BPJS, PPh21 (ID); SSB/PIT (MM) + HexaComply fix
3	Internal payroll — calculation, approval, Zoho Dr. Salary Payable / Cr. Bank auto-post, bank file
4	Hexa PR — OPEX approval platform. PR → approval → Zoho bill created. Payment → Zoho bill payment posted
5	Loan payment sub-module — loan schedule per facility, auto-triggered on 25th, Zoho interest/principal split
6	Bank reconciliation automation — statement upload, auto-match vs Zoho, flagged items, recon report
7	ARIA — AR collection cycle: auto-reminders, overdue escalation, DAR, collection dashboard + Project P&L
8	ARIA — Auto-invoicing to Zoho from CSI. Signed payroll report is a hard gate before invoice is raised
9	Fund flow dashboard — 6-week rolling cash forecast, entity cash ladder, T-5/T-3/T-1 payout alerts
10	Intercompany matrix automation — balances reconciled, elimination journals, mismatch flagged to CFO
11	Balance sheet breakdowns + accruals engine — 8 monthly journals auto-posted on 1st and 4th each month
12	Translation reserve auto-computation — MFRS 121, 7 currencies, consolidation-ready monthly output
13	Full system review and end-to-end test — all modules verified, Director presentation

PHASE 1 & 2 — CSI OPERATIONS, AP & CONTROLS

Dates	Module & What Gets Built
3–5 Jun Mon–Wed	CSI Flow API integration + Statutory module (EPF/SOCSO/EIS/HRDF/MTD, BPJS/PPh21, SSB/PIT) + HexaComply date fix. Ikham: CSI Generator API. You: Statutory + HexaComply. Parallel streams.
8–9 Jun Mon–Tue	CSI API go-live + end-to-end test. Full cycle: CSI upload → approval → bank file → payment posted → confirmation back to CSI app. Statutory tested on HSSB.
10 Jun Wed	Internal payroll section. HR data → calculation → approval → Zoho Salary Payable/Bank auto-post → bank file generated.
11 Jun Thu	Hexa PR — OPEX approval platform. PR → HOF review → Director approval (email token). Zoho bill created on approval. Zoho bill payment posted on payment. Hard gate: no PIR without signed PR.
12 Jun Fri	Hexa PR — Loan payment sub-module. Loan schedule per facility (Alliance, HLB x2, CIMB, Maybank). Auto-triggered 25th. Dr. Interest Exp + Dr. CL Loan / Cr. Bank posted in Zoho.
16–17 Jun Mon–Tue	Bank reconciliation automation. Bank statement upload → auto-match vs Zoho → unmatched flagged → recon report with supporting docs. All entities. Target: done by 2nd each month.

PHASE 3 & 4 — ARIA, FUND FLOW & CONSOLIDATION

Dates	Module & What Gets Built
18–19 Jun Wed–Thu	ARIA — AR collection cycle + Project P&L. Auto-reminders at 7/3/1 days. DAR auto-generated Mondays. Live AR aging dashboard. Project P&L by project code (Jendela, Kuching, Sacofa).
20 Jun Fri	ARIA — Auto-invoicing to Zoho from CSI. CSI approved + payroll report signed → invoice in Zoho (Dr. AR/Cr. Sales) within 48 hrs. Signed report is a hard gate.
23–24 Jun Mon–Tue	Fund flow dashboard + 6-week rolling cash forecast. Entity cash ladder (HSSB, KISB, PTHIT, HSPL). T-5/T-3/T-1 payout alerts. EOR vs project fund separation enforced.
25–26 Jun Wed–Thu	Intercompany matrix automation. All interco balances auto-reconciled. Elimination journals prepared. KISB-HSSB, HSPL-HCSSB, HSPL-PTHIT flows covered. Mismatch flagged to CFO.
27 Jun–2 Jul Fri+Mon–Wed	Balance sheet breakdowns + accruals engine. AR/AP aging, advances recon, prepayments, statutory liabilities auto-populated. 8 accrual journals auto-posted on 1st and 4th each month. Cuts close from 6.5 weeks to 15 days.
3–7 Jul Thu–Mon	Translation reserve (MFRS 121). FX translation of all entities (IDR, NPR, USD, BDT, MMK). Monthly avg rate P&L, closing rate BS. OCI reserve computed. Consolidation-ready output.
7 Jul Mon	Full system review + end-to-end test. All 12 modules verified. Director presentation.

PLATFORM OVERVIEW — HEXA FINANCE

Component	Description
CSI Flow	Core payroll & consultant payment engine. Spreadsheet upload → validation → approval → Zoho journal → Maybank bank file → payment → audit trail. LIVE.
Hexa PR	OPEX, loan and advance approval platform. PR → HOF → Director. Auto-creates Zoho bills on approval and clears them on payment.
HexaComply	Compliance calendar with real statutory due dates and triggers per entity and country. Already built, date fix in progress.
ARIA	Automated Receivable Intelligent Agent. Manages full AR cycle: invoicing from CSI, reminders, collection, DAR, and project P&L.
Fund Flow Dashboard	6-week rolling cash forecast per entity. Cash ladder per Group Treasury SOP. T-5/T-3/T-1 payout alerts. EOR ring-fencing enforced.
Accruals Engine	8 monthly accrual journals auto-posted on 1st and 4th of each month. Depreciation, tax provision, COGS, WIP sales, amortization, prepayments.
Interco Matrix	Intercompany balance auto-reconciliation, elimination journal preparation, TP markup validation. Mismatch flagged to CFO.
Translation Reserve	MFRS 121 FX translation for all 7 currencies. Monthly average/closing rates applied. OCI reserve computed. Consolidation-ready.

BENEFITS & EXPECTED OUTCOMES

Benefit	What It Means in Practice
Hours → minutes per cycle	One CSI upload drives accounting, bank file, and statutory output. No manual re-keying across Zoho, Excel, and the bank portal.
Month-end close in 15 days	Accruals auto-posted on fixed dates. Bank recon automated. No more 6.5-week close. IPO-ready reporting cadence.
Zero last-minute fund crises	6-week rolling forecast updated automatically. T-5 alert before payout if any entity is short. No more WhatsApp surprises 2 days before.
Built-in financial controls	Maker-checker approvals with tamper-proof audit trail. PR must exist before PIR. Signed report required before invoice. No deletable approvals.
Clean, reconcilable books	All transactions tagged to vendor, customer, and project. Zoho reconciles and reports by payee and client automatically.
Statutory compliance automated	EPF/SOCSO/EIS/HRDF/MTD/BPJS/PPh21 generated from the same payroll data. Deadlines tracked in HexaComply with real triggers.
Live project P&L	Every payment tagged to a project code. Director can pull Jendela, Kuching, Sacofa P&L in real time without asking Finance.
IPO-ready consolidation	Interco eliminations, translation reserve, and balance sheet schedules auto-generated monthly. Audit-ready without manual preparation.

WHAT THIS MEANS FOR THE TEAM

Role	How Their Work Changes
Finance Executives	Stop re-keying data across 4 systems. Upload CSI, the system posts Zoho, generates the bank file, and files statutory. Focus shifts to exception review, not repetitive entry.
Head of Finance (Ujjwal)	Approve via email token, not WhatsApp. Exceptions surface automatically. Fund position visible 6 weeks ahead, not 2 days before payout. Close tracked in real time.
Finance Operations Lead (Ali)	Daily Director tracker auto-generated before the 20-min call. All PIR check files in the system, not assembled manually. Interco and project P&L always current.
Director	One approval click for payments. Cash position on a live dashboard. No surprises on payout day. Audit trail for every decision. Monthly management accounts within 15 working days.
Ikhrum	CSI Generator connects directly to Hexa Finance via API. Payment confirmations flow back automatically. No manual handoffs between systems.
External Auditors	All audit schedules (FA register, AR/AP aging, bank recon, interco matrix, tax workings) auto-generated and consistently formatted. Audit prep time cut significantly.

KEY DEPENDENCIES & RISKS

Item	Detail & Mitigation
Ikhram CSI Generator API (Dependency)	Must be complete by Sunday 8 Jun. Integration picked up by Asim on 8 Jun. If delayed, statutory and payroll modules proceed independently on 8-10 Jun.
HR employee master data (Dependency)	Internal payroll module (10 Jun) requires clean employee data. Finance team to confirm data is ready by 9 Jun EOD.
Zoho API credentials (Dependency)	All Zoho auto-post modules require live API access. Already established from CSI Flow. Confirm all entities are connected before 10 Jun.
10/11/12 Jun — 1 day each (Risk: compressed)	Payroll, PR, and Loan modules are each 1-day builds. Feasible only if Zoho API is already working. Any auth issues on these days compress the schedule.
Bank statement format (Dependency)	Bank reconciliation (16-17 Jun) requires PDF or CSV statement from each bank. Finance team to prepare sample statements from all entities before 15 Jun.
30 Jun weekend (Note)	Balance sheet / accruals module runs 27 Jun (Fri) + 30 Jun (Mon) + 1-2 Jul (Tue-Wed). Weekend noted. Schedule accounts for this.
